

## **Disciplinary Guidelines for Criminal Conduct**

This document is provided by the Board to inform licensees, applicants, and the public of the Board's view of the effect of the first commission of certain crimes on nursing licensure and eligibility for nursing licensure. In some instances, the document may provide guidance when multiple crimes are at issue. In addition to utilizing this guideline, the Board may require evaluations from Board-approved evaluators to better determine the appropriate sanction and/or to determine whether a person is safe to practice nursing and is able to comply with the Nursing Practice Act (NPA) and the Board's rules and regulations, particularly when the underlying criminal offense involves alcohol, drugs, or controlled substances. This list is not exhaustive. In cases involving an offense that is not specifically listed in this guideline or a violation of another state law, federal law, the Uniform Code of Military Justice, or other law, the appropriate sanction shall be determined by comparing that offense to the listed crimes in this guideline that contain substantially similar elements. To the extent applicable, this guideline should also be considered in conjunction with the recommended sanctions in the Board's Disciplinary Matrix, located at 22 Texas Administrative Code §213.33(b). This guideline does not apply to criminal offenses that are addressed by the Board's minor criminal history policies. Further, this guideline applies to criminal offenses as those offenses have been addressed and/or adjudicated by the criminal justice/penal system, without re-litigating the underlying factual bases of the corresponding judicial orders\*\*.

For further information, please review the Texas Occupations Code Chapter 301 (NPA), the Board's rules, located at 22 Texas Administrative Code Chapters 211 - 227, including §§213.27 - 213.30 and 213.33, and the Board's disciplinary sanction policies located on the Board's web site, at [www.bon.texas.gov](http://www.bon.texas.gov). Texas Occupations Code Chapter 53 may also be applicable.

The guideline provides a recommended sanction or range of sanctions for each offense. In order to determine the appropriate sanction in a particular case, each case must be considered on its own merits, taking into account the presence of aggravating and/or mitigating factors. If multiple offenses are present in a single case, the most severe sanction recommended for any one of the individual offenses should be imposed.

The following list includes some of the factors the Board may use in its case-by-case analysis:

- the nature and seriousness of the crime, i.e. the presence or absence of criminal plan or premeditation, the presence of contributing influences, evidence of immature thought process/judgment at the time of activity, and classification of offense as felony or misdemeanor, etc.;

- a person's failure to disclose a criminal offense to the Board;
- the actual damages, physical or otherwise, resulting from the criminal activity;
- the extent and nature of the person's past criminal activity;
- if the person's conduct evidences a lack of truthfulness or trustworthiness;
- the age of the person when the crime was committed;
- the amount of time that has elapsed since the person's last criminal activity;
- the work activity of the person before and after the criminal activity;
- evidence of the person's rehabilitation or rehabilitative effort while incarcerated or after release\*;
- a record of steady employment and whether the person has supported his or her dependents;
- evidence of the person's present fitness and professional character, including letters of recommendation from prosecutors, law enforcement, and correctional officers who prosecuted, arrested, or had custodial responsibility for the person; the sheriff or chief of police in the community where the person resides; and any other persons in contact with the person;
- if the person has paid all outstanding court costs, supervision fees, fines, and evidence of restitution to both victim and community;
- if the person's conduct indicates an inability to practice nursing in an autonomous role with patients/clients, their families and significant others, and members of the public who are or who may become physically, emotionally or financially vulnerable;
- evidence of remorse;
- evidence of current maturity and personal accountability;
- evidence of having learned from past mistakes;
- evidence of current support structures that will prevent future criminal activity;
- evidence of current ability to practice in accordance with the NPA, Board rules, and generally accepted standards of nursing;

- the extent to which a license might offer an opportunity to engage in further criminal activity of the same type as that in which the person previously had been involved;
- the relationship of the crime to the ability, capacity, or fitness required to perform the duties and discharge the responsibilities of nursing practice;
- if imprisonment followed a felony conviction, felony community supervision revocation, revocation of parole or revocation of mandatory supervision\*;
- if the person's conduct resulted in the revocation of probation/community supervision\*;
- evidence of the person's safe practice;
- successful completion of probation/community supervision;
- if criminal activity is due to, associated with, or related to substance abuse or chemical dependency, including alcohol, evidence of evaluation by a Board approved evaluator, treatment (written verification of compliance with any treatment), after care and support group attendance, and evidence of random drug screening; and
- if criminal activity is due to, associated with, or related to mental illness, evidence of evaluation by a Board approved evaluator, including prognosis, evidence of treatment (written verification of compliance with any treatment), and any medication regime .

Being a nurse and having autonomy in the care of a vulnerable population may give that individual an opportunity to exploit the patient, employer, or other entities dependent on the professional character of a nurse. Patients would be vulnerable to similar acts involving intent to destroy property or inflict financial harm, as well as reckless acts that may harm patients or the public. Further, research studies suggest that individuals who commit these types of crimes may have underlying psychopathology.
