

Figure: 30 TAC §217.280(b)(2)(C)

Equation K.5.

$$R = \frac{\text{lbs NaHSO}_3}{10.9 \text{ lbs NaHSO}_3/\text{gallon NaHSO}_3} \left(\frac{1}{S} \right) \times 24$$

Where:

S = solution strength in percent

R = gallons per hour of sodium bisulfite solution
